NOT PUBLICATION-READY

ONE TAP / INPUT→RESPONSE — KIDS-ELEM1

Age guide: Kindergarten–Grade 2

Review prototype · style-neutral figures · not child-validated

KIDS DEVELOPMENTAL PROTOTYPE
NOT CHILD-VALIDATED
NOT PUBLICATION-READY

S01 — Two taps, two stories (OBSERVE)

Mira and Bolt sit with a tablet. First, Mira taps a lamp icon that only changes this device — the screen brightens right away. Next, Mira taps Refresh on a class page that sometimes needs the network. Watch both taps carefully. Write or draw: What changed fast? What waited? Keep your notes for the portfolio page later.

Try it: Observe one local tap and one network-ish tap; record what was seen.
Talk together: Supervise. No accounts. Separate “I saw” from “I think.”

NOT CHILD-VALIDATED
NOT PUBLICATION-READY**

S02 — Hardware and software (NAME)

Bolt points under the glass: hardware senses the touch — the touchscreen and chips you can touch if a grown-up opened the case. Step holds a checklist: software is the instructions that decide what happens next. Hardware notices. Software chooses. Say both words and point to an example.

Try it: Name hardware vs software with one example each.

Talk together: Keep definitions short and pointed at the device.

NOT CHILD-VALIDATED
NOT PUBLICATION-READY**

S03 — Input → process → output (NAME)

Fill three boxes with Mira. Input: the touch report (“someone pressed here”). Process: the app decides what to do. Output: pixels, sound, or motion you can notice. Draw arrows Input → Process → Output for the lamp tap.

Try it: Complete an IPO diagram for one local tap.
Talk together: IPO diagram on paper or whiteboard.

NOT CHILD-VALIDATED
NOT PUBLICATION-READY**

S04 — A four-step algorithm (PREDICT)

Step asks for a four-step algorithm for the local lamp tap. Example shape: 1) sense press 2) check which control 3) change brightness 4) show new light. Write your own clear order. Algorithms are recipes — order matters.

Try it: Write a 4-step algorithm for a local tap.

Talk together: Any clear order is OK; fix together if stuck.

**KIDS DEVELOPMENTAL PROTOTYPE
NOT CHILD-VALIDATED
NOT PUBLICATION-READY**

S05 — Local vs network (TEST)

Test time. Which tap stayed local — finished on this device? Which tap waited as if a message went out and came back? Ping draws two paths: a short loop on the tablet, and a longer path that leaves the room. Classify your two taps. Mark guesses with a question mark.

Try it: Classify taps as local vs network; mark uncertain inferences.
Talk together: Observation vs guess — label both.

NOT CHILD-VALIDATED
NOT PUBLICATION-READY**

S06 — Why feedback felt instant (EXPLAIN)

Sometimes a button highlights instantly even when new words are still traveling. Explain two timelines: Timeline A — local highlight. Timeline B — remote content. Instant does not always mean “finished everywhere.”

Try it: Explain two timelines for one networked-feeling tap.
Talk together: Two timelines on one page.

**KIDS DEVELOPMENTAL PROTOTYPE
NOT CHILD-VALIDATED
NOT PUBLICATION-READY**

S07 — Safe practice (SECURE)

Shield's checklist: Do not install unknown apps. Ask before sharing your name, photo, or school. Locks and passwords are tools, not toys to share. Safety without scare stories — we practice calm choices.

Try it: Complete a short safety checklist aloud or on paper.
Talk together: Safety without fear.

**KIDS DEVELOPMENTAL PROTOTYPE
NOT CHILD-VALIDATED
NOT PUBLICATION-READY**

S08 — Observation worksheet (BUILD)

Build a portfolio page with three columns: What I saw · What I infer · What I still don't know. Use your lamp tap and refresh tap. Inferences stay uncertain until tested. Unknowns are honest science.

Try it: Complete observation worksheet for portfolio.
Talk together: Portfolio piece — process, not ranking.

KIDS DEVELOPMENTAL PROTOTYPE
NOT CHILD-VALIDATED
NOT PUBLICATION-READY

S09 — Misconception check (REFLECT)

True or rethink: “Every tap goes to the internet.” Discuss kindly with Mira. Many taps finish locally. Some need a network. Evidence from your tests beats the slogan.

Try it: Revisit the misconception with evidence.

Talk together: Discuss kindly; no shame.

**KIDS DEVELOPMENTAL PROTOTYPE
NOT CHILD-VALIDATED
NOT PUBLICATION-READY**

S10 — Teach-back IPO (TEACH)

Teach a partner or caregiver the IPO path for one tap. Use Mira's cast roles if it helps: Bolt for parts you can touch, Step for instructions, Ping for optional messages, Shield for pause-and-check. Stop anytime. This prototype is for learning practice — not a test score.

Try it: Teach-back IPO path.
Talk together: Optional peer; easy stop.
